

Cleaning canola without losing good seed.
 Open up the sieves and shut down the wind to clean canola in the cleaner instead of blowing valuable seed or weed seeds back onto the paddock. Always use a 90mm PVC pipe in the scalp screen to keep it from blocking

Snails and bugs
 By using the small hole scalp screen in canola, conical snails can be removed with ease or large snails can be removed from wheat with wheat scalping barrels

Maize cleaning

Trucking away feed

High speed cleaning up to 80t/hr

Clover cleaning to remove 45% sand to a near perfect sample

Dirty wheat crop

Removing radish and ryegrass

Weed seeds

Clean sample
